Chamber of Thesprotia

The GET Deliverables - Establishment of Info kiosks in Thesprotia

Petros Zoumpoulis

Head Administrative of CCI

Project Manager

- The Chamber of Thesprotia (PB3), under Deliverable D.4.5, had the obligation to establish three (3) Info Kiosks in preselected areas in Thesprotia, with high accessibility to tourists, aiming at promotion of the Brand Identity of the paths.
- Info-kiosks will act as beacons of information for the new branded touristic historical & cultural paths

For their establishment was selected:

- a point near the Port of Igoumenitsa, serving both visitors to and from Italy and Corfu, also the locals
- a place with the maximum recognizability and visibility by the visitors, during the summer season
- a point that could be the starting point for exploring the mountainous volume and the hinterland

I am referring to the :

1st Info Kiosk at Igoumenitsa

2th Info Kiosk at Sivota

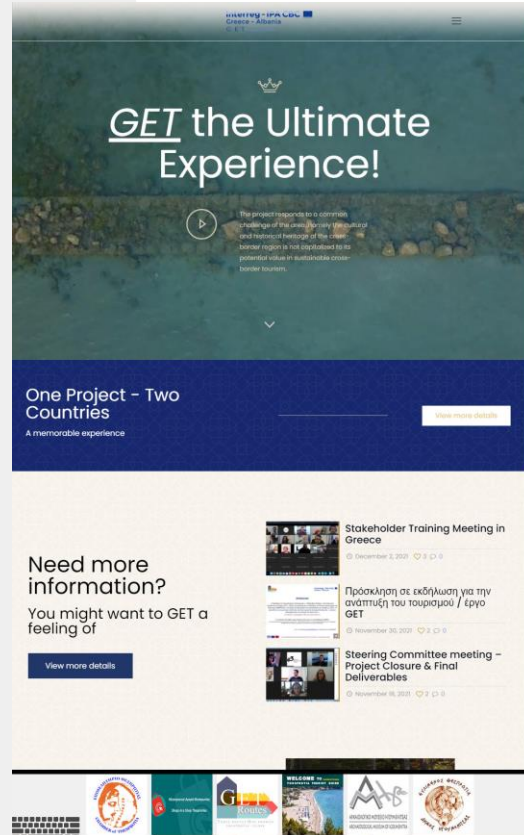

3rd Info Kiosk at Paramythia

The Project is co-funded by the European Union and by National Funds of Greece & Albania

General Features of Info Kiosk:

- Their Dimensions (in centimeters) are (HxDxW) 225x105x96
- It has a 32” Touch screen, flat type TFT monitor, 10 points, with anti-vandal protection of 4mm securit glass, and with Diagonal 31.5”, Contrast 3,000: 1 and Resolution 1920 X 1080.
- Computing power unit (CPU) Intel Core i3 3.6 GHz
- Total cost of supply, installation and operation € 23,299.60
- Additional costs and services: A system allowing us to monitor the surrounding area (thus avoid malicious acts) and a system allowing us to amend the provided information virtually.

- For the operation of the Info Kiosks, and to become reference points, with their continuous and efficient use, both by the visitors and the residents of the areas, we decided to cover a wide range in terms of information provided.
- Thus, in addition to the page of the GET project, which will be the main projection screen, the hosting of an additional five websites was also foreseen.

GET the Ultimate Experience!

The project responds to a common challenge of the cross-border tourism of small historical heritage of the cross-border region is not developed to its potential value in sustainable cross-border tourism.

One Project - Two Countries
A memorable experience
