| Summary of offer | <i>Export:</i> Paper Waste: OCC#11, SOP, Duplex, Colored Paper Plastic Waste: LDPE Clear, PP Big Bags, LDPE Agricultural Films LDPE/HDPE from Shredded and Washed Drip Pipes |
| <p><u>Description of Offer</u></p> <p>The company deals with the implementation and development of solutions for the conservation and improvement of the environment, through recycling and handling various types of waste products. The value leading the company's vision is its obligation to create a cleaner and greener environment for now and for the generations to come.</p> <p>The company's uniqueness is in handling the entire chain of value of the wastes. Beginning from the waste manufacturers, the company places various containers at their facilities, and lead these containers using its fleet to its facilities, where it handles the waste, sorts, separates and recycles it.</p> <p>The company is certified with the following quality standards: ISO 18001, ISO 9001 and ISO 14001.</p> | |

Among its customers are government facilities, local authorities, factories, public facilities and private customers.

Company's Activities:

- Recycling, collection and transportation of various waste.
- Separation systems management and waste removal consulting to factories.
- Wastewater and organic mineral treatment.
- Evacuation and treatment of contaminated lands.
- Development of Green energy installations.
- Destruction of special waste.
- Management and operation of landfill sites.
- Evacuation and treatment of poultry carcasses.
- Construction waste recycling
- Yard waste collection and crushing
- Asbestos removal
- Sludge treatment

The company specializes in operating landfill sites and recycling plants in which it collects, sorts and recycles paper and plastic waste.

The company owns 2 recycling plants located in the south of Israel:

1. Plant for Recycling industries: Here dry paper and plastic waste from industrial factories and local authorities is treated, sorted and recycled.
2. Recycling Site: where Plastic Agricultural waste is collected, sorted and recycled.

The company has extensive experience in exporting plastic and paper waste and in recent years, paper waste has been exported mainly to India.

The company is interested in expanding its customer base and penetrating new markets.

| | |

| Website | www.leakwise.com |
| Year of Establishment | 1991 |
| No. of Employees | 8 |
| Offer No. | 88954 |
| Summary of offer | <i>Export/Representation:</i> Line of Oil-on-Water Detecting and Monitoring Systems |
| <p><u>Description of Offer</u></p> <p>Israeli manufacturer of systems for oil sheen detection and monitoring systems, is looking for distributors in new regions in order to expand their customer base worldwide.</p> <p>The company's sensors use a patented high-frequency, electromagnetic energy absorption technique. Each floating sensor houses a high-frequency transmitter and a receiving antenna which continuously monitors the liquid surface.</p> <p>Our system consists of a wired or wireless signal processor and one or more sensors, depending on application needs. The sensors (certified as intrinsically safe) work in virtually any type of water. They continue to work even when coated with dirt or oil, thus eliminating false alarms. Our sensors are designed to perform for years and can be used to detect the interface between any two immiscible liquids with different absorption rates. In addition, they can differentiate between hydrocarbon and dry environment. No other oil sheen monitoring system does this. In light of increased awareness and enforcement of environmental protection regulations - our solution is critical to uphold the needed level of maintenance.</p> | |
| Potential Partners | We offer the products mainly to industrial end users worldwide either directly or through a network of distributors. The company is constantly looking for additional sales partners with relevant experience and access to potential end users and markets, for selling and giving technical support for Leakwise products. Our partner's role: Find new customers, find new applications, get information about relevant bids, get information about competitors in the territory, give customers excellent technical support and installation on site, help in |

| | |
|-------------------|---|
| | increasing the reputation of the product line. |
| Target Countries | All post-Soviet states, and particularly Russia, India, Korea, Argentina. |
| Other Information | <p>The company developed and continues to develop a series of oil-on-water detection and monitoring systems named Leakwise. The systems are installed worldwide in a variety of applications, where customers must monitor processes that involve many types of oils, and to monitor the water released from the process to the environment. Oil can be petroleum products, cooling oil, lubricating oil, edible oil, organic solvents, etc. Early detection of oil leaks or spills is achieved by using Leakwise systems, giving the ultimate solution to customers interested in avoiding expensive downtime, regulatory fines and cleanup cost.</p> <p>The product line includes solutions for a wide range of applications, including monitoring in normally dry locations, monitoring oil layer thickness up to 200mm, monitoring in turbulent water, monitoring in deep wells, and more. The systems are easy to install and calibrate and require minimum maintenance. The systems are reliable and don't give false alarms. They have local status indication and a connection to a central control room.</p> |
