

THE COMPANY

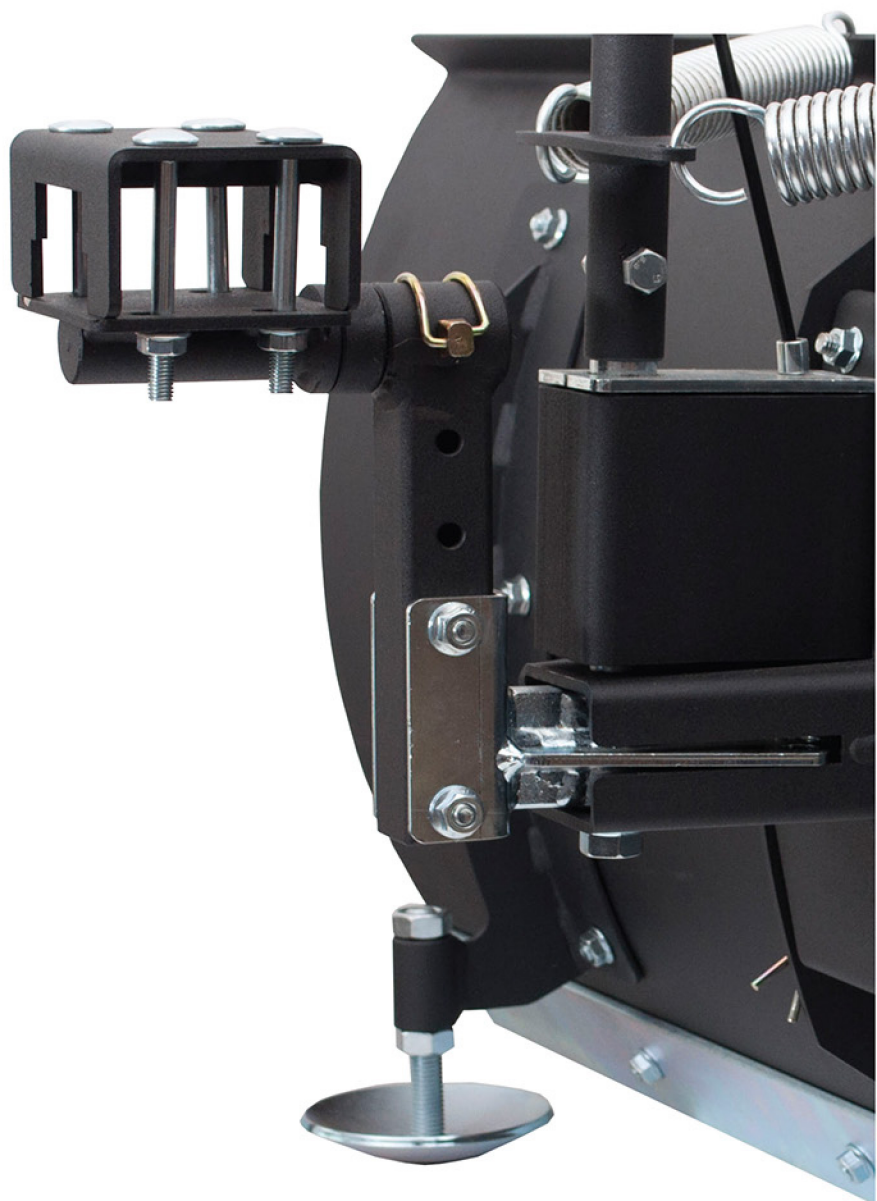

Prisma - 50 Ltd was established in 1995 in the city of Plovdiv, Bulgaria, with its main scope of business being development and production of attachment/accessories for tillers, motor cultivators and two-wheel tractors. In addition to our ownengineered products, the company also manufactures products as per client's design documentation. The company team strives to offer our customers prudent solutions with the desired quality while adhering to shortest terms possible and reasonable pricing.

MAIN ADVANTAGES

- Wide range of products
- Short lead times
- Swift communication
- Strict adherence to delivery schedules
- Provision of sample for preliminary product evaluation
- Willingness to cooperate and develop new products
